

SoloFill series www.emmersvuljezo.nl

The SoloFill is an easy-to-use bucket filler. The machine has smart and simple construction details that make it more compact and safer. In addition, the SoloFill is available at a friendly price.

The SoloFill uses a platform with an integrated system to directly drain spilled water.

Flower containers of different sizes will be filled with a metered quantity of water.

The containers are filled at an ideal working height to be set by you. When the container is filled with water and flowers, the container can be replaced for an empty container.

Advantages SoloFill

- Compact, safe and easy to operate.
- Ergonomic working height.
- No dripping hose.
- Can be placed almost everywhere.
- Friendly priced.
- Maintenance-free.

Characteristics SoloFill

- Suitable for different sizes of containers.
- Dosing station for water and, if needed, flower food.
- Completely made of stainless steel.
- 230 Volt.
